Additional Questions:

Does BackorderOrderID column contain necessary information for this query?

Steps:

1. Make copy of the original data.
2. Remove the noise.
3. Confirm there are no duplicates using conditional formatting on OrderID column.
4. Multi Sort the customers by highest order amount.
5. Remove duplicates from CustomerID column.
6. Sort by highest order amount again.
7. Filter for top 50 items.
8. Copy to a new sheet.
